

Site Safety

Fall Protection • Intrinsically Safe Lighting
Airbags • Fire Point Trolley

Soft Landing Bags

The new air cushion fall protection system brings a new perspective of speed, convenience and adaptability to protecting your workforce on site. The inflatable air bags are quick and easy to install and easy to transport from site to site.

- Fire retardant
- Low environment hazard
- **Minimum hire period applies**

Code	7 Days	Info
LD99	POA	2.5 x 0.55 x 0.55m
LK54	POA	Inflatable

Fire Point Trolley

Two extinguishers (one powder and one foam), fire blanket and fire bucket mounted on a mobile trolley.

- Extinguisher contents charged extra if used
- **Minimum 1 week hire**

The HAVI

NEW

The HAVI is a simple and compact device that is used for monitoring trigger time and calculating exposure to vibration.

Code	1 Day	2 Days	7 Days	Info
24AK	7.50	10.00	12.50	The HAVI

Trigger Timer

This system is suitable for use on pneumatic and electrically powered tools and offers a solution to managing tool use in the work place.

The timer is a small box that fits into either the electric supply cable or air hose, and whilst the tool is in operation, the clock on the timer is counting the number of minutes the tool has been used. This assists in the management and control of vibration exposure.

Code	1 Day	2 Days	7 Days	Info
1353	20.27	27.02	33.78	110v
1354	20.27	27.02	33.78	Air

Staging Hand Rail System

When used in conjunction with 450 and 600mm staging boards (see page 44) the handrail and post provides a safe system of work, essential when working at heights.

- Each set creates a handrail on one side only
- **Minimum 1 week hire**
