

ARVID BOX TRUCK

A first for any UK HIRE COMPANY

In recent years Sweden has exported some its famous products and people into the U.K including Ikea, Sven Goran Eriksson and Dust-control depending on your thoughts of shopping, football managers and dust-free working!

Only the latter has forced its way into the Brandon Tool Hire team but that is about to change with the Swedish "Arvid Box Truck" being added to the Brandon Hire fleet, a first for any hire company in the U.K.

The Box Truck first caught the eye of Bob Baber, Brandon's Head of Buying, on a fact-finding trip to Sweden last year where the Box Truck appeared common on most construction projects and is considered a necessity by everyone on site.

All trades used the highly mobile container for a variety of uses including rubbish and waste

collection, material and product handling and even as mobile toolboxes complete with lockable lids!

With large pneumatic wheels and a lockable castor the 400litre container is highly mobile and allows up to 750Kg to be carried safely and easily on site. Its protective, non-blackening rubber edging strips also mean less damage to door linings and architrave ensuring the Box Truck earns it's keep from the beginning stages of a construction project right through to final fix and clean up!
