

# NEW BUMPA II & HODDI

## New Bumpa II but **BRANDON ON TOP.**

Brandon Hire now has one of the largest fleet of the new Bumpa II tile and block elevators in the country. Regulations on materials handling and insistence on Method Statements of how you are loading roofs and scaffold, have rocketed demand for this fast, cost effective, method of loading.

Boasting a 4-minute set up time, the new **BUMPA II will load 1000 tiles** on the roof in 25 minutes or a pallet of blocks in 44 seconds.

The **BUMPA II** and **HODDI** elevators load tiles, fittings, felt, bricks, blocks, cement etc., from single to 3 storeys, not only do they load but they have a powered reverse for stripping materials down!

So double your performance with half the effort with BUMPA @ BRANDON.
