

ELECTRIC ELEVATOR

Uplifting Experience

One of the latest additions to the Brandon Tool Hire fleet is the Hoddi electric elevator.

Introduced to make the life of every builder and roofer that much easier and enable you to comply with the health and safety legislation, which stipulates you must provide a mechanical means for handling repetitive loads rather than relying on manual labour.

The time consuming, backbreaking chore of carrying repetitive loads up a ladder becomes quick and easy with this versatile loading machine with a maximum lift of 5.5m.

Carried on the roof of any small van and erected up and running in under four minutes, the Hoddi's capacity to clear a pallet of concrete blocks in under a minute, or a thousand tiles in twenty-five minutes make it a must for every builder.

REF:BN02-04
