

# LUMINATOR LIGHTING

## Turn Night INTO DAY.

**A completely new transportable lighting tower is now available from Brandon Tool Hire with the Luminator. This fully automatic, award-winning design provides 100,000 Lumens of light with its metal halide light head giving either 180 or 360 degree coverage.**

A functional LED illuminated control panel allows the operator to raise the light up to 3.5m high, providing light exactly where it is needed and then by simply pressing a button, retract the light with an automatic off-switch to complete the cycle.

An automatic siren warns the operator of the Luminator's descent with the self-levelling stabilisers, complete with LED leg illumination adding to its impressive range of safety features. A failsafe battery

*The Illuminator offers 360 or 180 Illumination.*

power supply lets you down the Luminator mast can still be retracted.

When closed the Luminator is 1.88m high and weighs 105kg allowing it to be transported in a large estate car with its three transportation wheels making on site movement very simple.

Amazingly for such a powerful light, its power

supply can be either mains electricity (via a transformer), or from a 2.0Kva generator making the Luminator ideal for emergency work, security lighting and special events.
